Cabinet Forecast

The Ottawa Journal in a news
page feature Tuesday carried the
following: "It is reported in some
quarters that for the time being
Mr. Bennett will himself take the
portfolio of finance. The various
portfolios, it is understood, have
not yet been allotted, but the
probabilities are that the new
cabinet will line up roughly as
follows:

Minister for external affairs and
minister of finance—Hon. R. B.
Bennett.
Minister of justice—Hon. Hugh
Guthrie.
Minister of railways—Hon. Dr.
Manion.
Minister of public works—Hon.
Arthur Sauve.
Postmaster general—H. A.
Stewart.
Minister of agriculture—R.
Weir.
Minister of national revenue—
R. C. Matthews.
Minister of defence—Col. Don-
ald Sutherland.
Minister of health and pensions
—Col. Murray McLaren.
Secretary of state—Maurice
Dupre.

Minister of marine—C. H.
Cahan.
Minister of fisheries—Thomas
Cantley.
Minister of labor—W. A. Gordon.
Minister of interior—Unde-
cided (to go to Manitoba).
Solicitor general—Alfred Duran-
leau.
Minister of trade and commerce
—Hon. H. H. Stevens.

Miss Eileen Bjork passed her
Grade X examination successfully.
Mrs. Ferguson, of Rolling Bay,
wash., visited last week at the
home of her niece, Mrs. Cooley.

Misses May Todd and Melinda
Long arrived home Sunday morn-
ing after their holiday at the coast.

Mr. and Mrs. Lock, of River-
hurst, Sask., also A. A. Stevens,
of Granum, formerly of Chinook,
visited at the home of W. W.
Isbister this week.

Miss Hazel Ray, of Carstairs, is
at present visiting at the home of
her sister, Mrs. Cooley. Miss Ray
has accepted a position in a school
near home and has resigned as
teacher at Longdale school,
north of Cereal.

Hail Again Does Damage

The second disastrous hail
storm of the season visited the
districts to the west on Saturday
afternoon, when the hail driven by
a strong gale from the northwest
greatly damaged crops in the dis-
tricts through which it passed. In
the Hand Hills country, south
west of Hanna, much damage was
done. The storm traveled east
and south, cutting a wide circuit.
In the district around Richdale
and Stanmore the storm was very
severe. At Youngstown the crop
was damaged from 15 to 100 per
cent. Upon approaching Youngs-
town the storm divided and creat-
ed havoc to crops one mile north
and traveled east, doing consid-
erable destruction about four miles
north of Chinook. As in the case
of the previous hail storm, many
good crops which carried little or
no insurance were wiped out.
The path of the storm was very
irregular, one farmer being hailed
out while his next door neighbor
would not be at all damaged, and
only parts of certain fields were
badly damaged.

Collholme Collections

F. Hobson was busy putting up
feed last week. He cut his hauled
crop and it will make excellent
feed for the stock in the coming
winter. About fifty loads were
put in stacks.

G. Ray and Jay Robison have
moved the house formerly owned
by H. Strong and are just getting
settled in it, after the disastrous
fire which recently demolished
their home.

Miss Grace McCall is visiting
with her aunt, Mrs. N. D. Stewart,
during the holidays.

Elmer Spreeman was ill last
week, owing to the extremely hot
weather and dust. Walter, how-
ever, managed to put through by
staying in the shade.

Mr. Horne, the Rawleigh retail-
er, was in the district last week
selling his good health products,
among which is gum.

Mr. and Mrs. H. Smith, of
Clemons, visited last Sunday at
the Belmont home.

C. B. Hittle and John Mac
Kinnon took in the Youngstown
fair last Thursday afternoon.

Another company of Collholme
and Big Spring folks motored to
Gray Lake last Sunday, when
they spent a most enjoyable day,
bathing, playing ball, etc. Al-
though a very enjoyable time.

Misses Dorothy and Ruth Rob-
inson are visiting at the Morrison
home for a few days, also the
MacPherson girls are spending a
few days at the home of F. Hobson.

The high school pupils who
thus far have received their re-
turns and who successfully passed
the examinations are A. Mac
Pherson, W. Morrison and Estelle
MacKinnon. The latter passed in
all but one subject.

Mrs. Nelson, of Conrey, and
Mr. Prouty, of Manyberries, who
have been visiting at the home of
Oscar Nelson, left Friday for their
homes in the Conrey district.

Mrs. John Jones, of Wastina,
visited with Chinook friends on
Saturday, prior to leaving for
Bonnyville, Alberta, where she in
future intends to reside. Mrs.
Jones took the train Sunday morn-
ing for Calgary, where she will
spend a few weeks with her son,
Lawrence, before going to her
new home.

Heard Around Town

Miss Gladys Wright passed her
Grade X examination successfully.

H. James, of the Chinook Ad-
vance, visited in Hanna over the
week end.

Mrs. Thos. Gilbertson was quite
ill last week, but is able to be
around again.

Geraldine Elliott of Alsask, for-
merly of Chinook, is spending her
vacation with Wilma Hurley.

Mr. and Mrs. J. W. Lawrence
and daughter were business visi-
tors in Youngstown Tuesday.

A. J. Mumford is driving a new
Fordor Sedan, purchased from
Cooley Bros., local Ford dealers.

Mr. Kew, of Calgary, has leased
the dining room at the Acadia
Hotel and took charge Tuesday.

J. E. McLeod and family, of
Youngstown, were guests at the
J. W. Lawrence home on Friday.

E. E. Jacques and family left
Saturday by motor for Calgary
and Banff to spend a short vaca-
tion.

L. S. Dawson and family left
by motor this week to spend a
vacation at Edmonton and other
places.

Miss Doris Marcy passed her
Grade XI examinations success-
fully, her average being 87 marks
on 8 subjects.

Mr. and Mrs. S. H. Smith and
Mr. and Mrs. M. F. Sultor were
guests on Sunday at the home of
J. W. Lawrence.

Geo. E. Aitken, who has been
visiting with friends at Winnipeg
for the past month, arrived here
Sunday morning.

Wm. Vennard is not well these
days. Mrs. A. McLellan came
yesterday and will look after Mr.
and Mrs. Vennard.

Jas. Aitken, of Vancouver, ar-
rived here by motor on Sunday
morning to assist in the harvest-
ing of their crop of grain.

The Laughlin Echo Club met
last week at the home of Mrs.
White. There were 14 present
and a good time was spent by all.

Miss May McLean and Miss
Daeggett, of Providence, R. I., were
guests at the home of H. G.
Strong, south of town, last week.

A number of ladies and young
people from town were Cereal
visitors on Tuesday and from all
appearances were having a good
time.

Mrs. B. Dobson left Sunday
morning for her home in Calgary,
after having spent a week's vaca-
tion visiting at the home of Mrs.
F. Otto, also other friends.

On account of the early start of
harvest the store keepers of Chi-
nook have decided to keep open
on Wednesday afternoons. The
half holidays ceased on Aug. 6th.

Mr. and Mrs. C. W. Rideout,
two daughters, Audrey and Donna
May, and little son Eldon, left
Wednesday morning by motor for
Banff, where they will spend a
ten-day vacation.

A number of the citizens of the
town met at the curling rink last
Monday night to give a welcome
to the newly weds, Mr. and Mrs.
Norman Coad. The gathering
took the form of a charivari.
There were over twenty present,
and those who did not attend
heard at least part of it. We are
glad to welcome Mr. and Mrs.
Coad to Chinook.

Farmers Are Buying Equipment
That Helps Them

"Lick The Cost of Production"

Massey-Harris Harvesting Machinery and Power Farming
Equipment lower production costs to the minimum. Farmers
who are using up-to-date Massey-Harris Equipment are
making a profit even when crop conditions and prices are
unfavorable. It is during harvest that modern machinery
makes a big saving for its owners. Let us show you the
money making ability of Massey-Harris Machinery—the
equipment that helps them "lick production costs".

Cause Of Our Economic Ills

Anything and everything that will have even the slightest effect in removing causes of friction between nations on the one hand, or of promoting goodwill on the other hand, should to an ever increasing degree receive the support of every government, every organization, every individual. There is danger as we get farther and farther away from the agony of the war years, 1914-1918, and as the horrors of that grim struggle begin to fade and become indistinct in our memories, to forget just how awful war really is.

It is well, therefore, to be occasionally reminded of what the Great War continues to mean to us today, twelve years after it passed into history. Hon. Philip Snowden, British Chancellor of the Exchequer, whose outstanding characteristics in all his public speeches is his clear incisiveness, unswayed by hysteria or undue sentiment, gave a radio talk recently in which he pleaded for world peace, and for the putting forth of every effort to attain that object.

Despite Mr. Snowden's well known pacific tendencies, he dealt only with the mere dollars and cents aspect of war as an agent of destruction. Taking the case of Great Britain, he pointed out that it had spent some 50,000 million dollars on its part in the Great War. This was apart from the loss of the wealth-producing capacity of millions of men drawn for four years from useful employment, and of course took no cognizance of the loss of life.

The war, as Mr. Snowden pointed out, left Great Britain with a debt of over thirty-five billions of dollars, the interest on which alone costs one and three-quarter billions a year. It all has to come out of taxation.

At the present rate of payment, Mr. Snowden added, it will take 140 years to wipe it out. Today the British people are raising \$5,000,000 every day, \$20,000 every hour, \$3,000 every minute for debt purposes. It takes the whole-time labor of 2,000,000 workers year in and year out to pay the annual cost of the nation's burden of debt. To this must be added \$575,000,000 which Britain annually spends on war services, and \$280,000,000 it pays yearly for war pensions, which gives a total of \$2,800,000,000—\$5,000 a minute,—which Great Britain has to provide for war purposes.

Such stupendous figures throw Mr. Snowden's main point into bold relief. "It passes the power of the most imaginative mind," he said, "to conceive what prosperity and happiness could be added to the world if the resources wasted by war could have been used for the advancement of human wealth." But even the least imaginative mind must realize from the figures that now is the time for all good men and women the world over to ponder the folly of preparing for another war.

The great economic ills from which the world is suffering today,—and from which Canada unfortunately is not free,—could all be overcome if the huge amounts raised by taxation to pay war debts could be diverted into constructive channels, not to mention what might have been done had the enormous principal sum expended during the war itself been devoted to improving world conditions in all countries.

If the money spent waging war, by Britain alone, had, instead, been devoted to great constructive national programmes, there would have been no unemployment in Britain. Everybody would have been busy during the past twelve years. There would have been no unemployment in the world. The whole standard of living in Britain would have been raised; housing and all social conditions would be on a higher plane than ever in the history of the world.

And what would have been true of Great Britain would be equally true of all countries, Canada included. It is easy to thoughtlessly lay the blame for unemployment, depressed business conditions, falling markets, and sundry other ills on the war, and to lay the blame here or there, but the basic cause is the war, and the huge burden it has imposed on all peoples and on every constructive, progressive movement that the peoples of the world, in their several countries, are anxious to carry on.

Campaigning for world peace is not a tad, nor the mere business of the idealist. It is the hardest headed business proposition confronting the world today. In its success is bound up the future welfare of every worker, every man and woman, the future of their children and children's children.—indeed their very lives. Only through the achievement and maintenance of world peace can the present economic ills of the world be remedied.

A Clock That Speaks

Combination Radio and Electric
Phonograph Is Result Of
Experiment

After considerable experimentation, an inventor has produced a clock that speaks the time. The instrument consists of a combination talking clock, radio and electric phonograph all installed in a grandfather case. The clock not only speaks the hours and half hours, but also may be made to tell the time in the form of a cheerful greeting, such as "Good morning—six o'clock." The cabinet contains an electric radio receiver with dynamic speaker which is used for the talking clock voice, the radio, and the phonograph reproduction.

Good Roads In Ireland

Country Carrying Out Reconstruction
Program Every Year

During the past five years, twenty-seven miles of concrete road have been laid in County Antrim. The programme which has been followed has been the reconstruction of about five miles per annum of the worst sections of the heaviest trafficked road. During 1929, sections of these sections have been linked up, and by the end of the year there will be one section seventeen miles long. This will be the longest stretch of continuous concrete road in the British Isles.

**KIDNEY TROUBLE
BACKACHE VANISHED**

"Like magic," says Mr. A. Challegny, "thousands with kidney and bladder troubles, constipation, indigestion, gas, backache and overweight with 'Fruit-A-Tives' have been cured. I was cured. I was quiet. Sound sleep at once. Get 'Fruit-A-Tives' from drug stores today."

FRUIT-A-TIVES END YEARS OF MISERY

Manitoba Water Power

Claimed That Bulk Of Water Power
In Prairie Provinces Located In
Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000,000 h.p. of which 308,000 h.p. already are in operation. It is claimed that 72 per cent of all the water power resources in the prairie provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

It might be worse. Suppose we were born old and had to dread growing young and foolish.

A pessimist is a man who, when given his choice between two evils, takes both of them.

For all Skin Abrasions—Minard's Liniment.

Believes In the Pool

Present Low Prices No Cause For
Despondency To Pool Members

In the editorial columns of the Alberta Farmer, dated July 10, 1929, reference is made to the fact that in spite of the existing depression in the wheat market, Pool members are not despondent. We quote from the editorial:

"On the contrary, when they look back to pre-Pool days they congratulate themselves that the Pool is functioning in this year of low prices. And they shiver when they think to what depths wheat prices might have gone had there been no Pool."

Pale People Are In Peril

Some Form Of Nervous Break-
down Always Threatens
Them

Pale people are almost always nervous. Paleiness denotes lack of blood and too little blood usually results in faded nerves, sleeplessness, headaches or neuritis. Dr. Williams' Pink Pills are different from most other medicines—it is impossible to take them and not feel better. Their whole mission is to make rich, red blood. This new blood strengthens the nerves and gives vitality to the whole body. Concerning them Mrs. G. Cook, Bloor Street, Toronto, says: "Two years ago I used Dr. Williams' Pink Pills for a nervous breakdown with the result that I have been well and strong ever since."

You can get these Pills from any dealer in medicine or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Noted Soldier Passes

Lieut.-Col. Hon. Cuthbert James Had
Colorful Career

Lieut.-Col. Hon. Cuthbert James, M.P., died in London, England, recently in his 59th year, his death ending a most colorful and varied career.

Col. James joined the Egyptian army in 1899, served in the first white Nile expedition against the Khalifa, and subsequently became administrator of Wadi Halfa. He also served during the Great War.

He was champion boxer of the army and navy in 1898 and he was always keenly interested in sports. Lieut.-Col. James was Conservative member of the House of Commons from 1906 to 1920.

Miller's Worm Powders are a prompt relief from the attacks of worms in children. They are powerful in their action and, while leaving nothing to be desired as a worm expellant, have an invigorating effect upon the youthful system, remedying fever, biliousness, loss of appetite, sleeplessness, and other ailments that follow disorders caused by worms in the stomach and bowels.

Young Artist: "You are the first of my models I have ever kissed!"
Model: "How many have you had?"

"Four! An apple, a banana, a bouquet and you!"

Big Steel Plant

Announcement is made of a \$23,000,000 steel plant to be erected near Vancouver in connection with the iron deposits on Texada Island.

**When
BABIES
are Upset**

BABY ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your own—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be your everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

**Flotcher's
CASTORIA**

PAIN PAIN

Ends in 1 Minute

"It is the best of all pain killers. In minutes with 'Sootha-Solve,' writes a doctor, 'any pain is relieved. No more year-had. Avoided operation.' Get instant results today. All druggists."

Experiments In Television

Broadcasting Of A Play In English
Not a Complete Success

For the first time in England the Baird system of television was supplied to the public, although still in the experimental stage, with the broadcasting of a play by the British Broadcasting Corporation. The piece chosen was Luigi Pirandello's "The Man With a Flower in His Mouth."

The London Times assigned its regular dramatic critic to review the television production and in his review he said:

"It is admitted at once that plays by television are as yet a subject for men of science and not for critics of the finer points of acting. The visual transmission is far from perfect. You feel yourself prying through a keyhole at some awaying, dazling exhibition of the first film ever made. But if the process has still a long way to go before every subscriber of the British Broadcasting Corporation is fully satisfied by seeing and hearing plays in his own library, the difficulties already overcome are many and remarkable."

The space in which the actors have their being is half a small cube, sliced diagonally by an effective plane of photo electric cells. The actor kept as close to the projector as a man with his head in a band box with his movements slow and deliberate. When another actor appeared a chequered screen passed across the "stage" and the scenery provided by C. R. W. Nevison's drawings instead of a screen.

The television "stage" is perhaps the world's most intimate theatre, with the producer, L. De G. Sieveking, working in inches, where others work in yards. What its audience saw in television was an image of spot postcard size of varying clearness. The London Times concludes its review by saying: "The men of the theatre may meanwhile rest in peace. The time for interest and curiosity is come, but the time for serious criticism of television plays as plays is not yet."

Luxury For the Desert

Tourist Camp Will Be Established In
Central Australia

Sydney, Australia.—New luxury will be introduced into the arid areas of Central Australia by the tourist camp which the Commonwealth railways department is about to establish there. Camps which will be moved every day or two will be electrically lighted; there will be portable showers, radio receiving sets portable gramophones. The catering too, received particular attention. Experienced men will provide elaborate menus which would do credit to a first class hotel.

U.S. Trade Slump

Declines To Lowest Level In The Last
Six Years

International trade of the United States during June declined to the lowest monthly level the country has experienced in the last six years. Exports amounted to \$229,000,000, a figure less than that of any month since July, 1924.

Imports for the last month were \$255,000,000, which is lower than those recorded since January, 1922. Imports and exports for June were each approximately \$100,000,000 below those for the same month last year.

Delegates From Argentine

The Canadian Government, through its trade commissioner at Buenos Aires, has invited the Agrarian Producers' Union of the Argentine, to send a delegation to Canada to visit principal centres of production for studying modern methods of handling cereals as well as the Canadian grain elevator system.

Recognized as a leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a remedy for suffering children everywhere. It seldom fails.

Come-to-Grief Airman — I was trying to make a record.
Farmer.—Well, you've made it, sir; you be the first man in these parts who climbed down in these parts without having to climb up it first.

It cost Kaye Don and his backers \$250,000 to find out that a Silver Bullet is not as swift as a Golden Arrow.

The little green calloppe humming bird is the smallest American bird.

Minard's Liniment removes Warts, relieves Bunions.

Saskatchewan Wheat Pool

Ballots In Connection With Hundred
Per Cent. Pool Legislation Have
Been Mailed Out

Ballots in connection with the referendum on 100 per cent. pool by legislation have been mailed out to all Saskatchewan Pool Growers who are recorded on the Company's books as shareholders and who are signers of the current contract. The question which is being asked the contract signers on the ballot provided is: "Are you in favor of your directors asking Government to pass a Grain Marketing Act to provide that all grain grown in Saskatchewan must be marketed through one pool, provided"

(a) That before the proposed Act should come into force it must receive a two-thirds majority vote in a special referendum of all grain growers in the Province to be conducted by the Government.

(b) That the grain pool to be provided for must be entirely under the control of the growers delivering grain. And further, that all producers of grain (whether Pool or Non-Pool), must have an equal voice in the control of the organization."

Persian Balm promotes cleanliness, charm and beauty. It is unrivaled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin. Stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant. Imparts youth and loveliness to the complexion. Persian Balm is the inevitable choice of the woman who cares.

May Recover Jewels

Gems Belonging To Nobility Lost In
Airplane Crash

The London Daily Express says jewels valued at \$65,000 (about \$325,000), were scattered over the ground near Meopham, Kent, at the time of the recent aeroplane disaster in which six persons, including three of the nobility, perished.

The jewels in question belonged to the late Viscountess Edman and the late Mrs. Lieffler, both of whom were wearing pearl necklaces and diamond brooches. Accidental discovery of a few gems by a villager reminds friends of the dead women that they had their jewelry with them. Police are searching around Meopham in the hope of finding them.

The Royal Canadian Mounted Police consists of about 50 officers and 900 privates.

Exhibition Grain

Grain To Be Shown At World's Grain
Show May Be Grown Any Year

There still seems to be a wrong impression in some parts of Canada regarding the year in which grain for exhibit at the World's Grain Show may be grown, says a bulletin of the show executive. It is well, therefore, to repeat that there is absolutely no restriction whatever regarding the season in which grain for exhibit is grown.

It may have been or may be grown in any year. Of course, because all exhibits must be in the hands of the exhibition authorities at Regina on or before March 1, 1932, it will be impossible to grow Canadian grain for exhibition in 1932. Canadian grain for exhibit therefore, if not already grown, must be grown either this season or during the season of 1931.

Water Makes Crops

In the production of one bushel of wheat nature uses over thirty-one tons of water. This is but one of the very interesting facts disclosed in studies of soil moisture and crop production by experts of the Dominion Department of Agriculture.

Prices Of Livestock Reveal Remarkable Strength Compared With Other Farm Products

In the price changes that have taken place in farm products, as also in other commodities, in the last 12 months, livestock food products stand up with outstanding strength. Lambs, hogs, and cattle—in that order—are now at a much higher level relative to the value of the same products a year ago than are butter, wool, wheat, and barley.

Prices for farm products in Canada have changed considerably since last summer and especially during

expressed as a percentage of the prices existing in July, 1929, which are taken as the base of 100. The table on this page gives both the monthly prices and the percentages that each month's price for each item forms of the base price. In the chart only the percentage changes are shown.

A glance at the right hand side of the chart will make it plain that at the end of the period three items, lambs, hogs and cattle, were well above butter and far above wool,

the first half of 1930. The tendency of all classes of livestock, wheat, feed grain, butter, and wool, which are fairly representative of general farming, has been downward.

A noteworthy feature is that the price level of livestock has not dropped so much as that of other farm products and they are the only items to show seasonal strength within the last two months.

The accompanying chart shows the percentage changes in relation to each other and in each commodity. The monthly average prices as reported officially have been taken and the changes from month to month

wheat, and barley in comparison with prices a year ago.

For the twelve months, therefore, it is evident that these three classes of livestock have declined less in price than other farm products and other commodities. They have shown fluctuation up and down, but their general level has been better maintained than in the other items.

If a lesson had to be pointed out it would be that meat-yielding livestock is a more productive form of farm husbandry than it is often considered. This is especially so at present with the low levels reached by grains and other feeds.

Western Flour Mills

Industry Ranks First In Manufactures In Alberta and Saskatchewan

The flour and grist mill industry ranks first among the manufactures of two of the three prairie provinces. This industry comes first in both Saskatchewan and Alberta, and second in Manitoba. First position in Manitoba is held by slaughtering and meat packing, which is third in Saskatchewan and second in Alberta. Second position in Saskatchewan is occupied by butter and cheese, which is fourth in Manitoba and fourth also in Alberta. In point of production value, flour and grist mill products in Alberta, and slaughtering and meat packing in Manitoba were almost equal in 1928, the former having a value of \$21,005,000, and the latter of \$21,326,000.

Growing Exhibition Grain

Practical Suggestions For Preparing Grain For World's Grain Show

At the recent meeting of the Manitoba Seed Growers' Association at Brandon, Dr. McEwen, agronomist of the M.A.C., gave the following practical suggestions for the growing and preparing of grain for exhibition at the World Grain show in Regina in 1932.

Dr. McEwen stated that the first essential was to obtain good, clean seed, pure as to variety since the grain samples will naturally be thrown out. The seed should then be sown on clean land to avoid mixing from volunteer growth. Treating, for both loose and covered smut would avoid loss from this source. Sulphur dusting and early seeding would overcome the shrinking due to rust damage. A satisfactory sulphur dust can be procured from F. H. Wiley, 533 Henry Avenue, Winnipeg, and a small hand duster from the Niagara Spray Company, Middleport, N.Y. An application at the rate of 45 pounds of dust weekly from the time when rust first appears on the plants has usually given a fair control of rust.

When harvesting select the best sections in the field, pull out all off type plants and any other grains since it is much easier to clean in the field than it is to clean later. Avoid any marginal material because it is usually later and somewhat coarser. All grain should be left to mature before it is cut. After cutting it may be as well to cure some both ways. If cured outside it should be put up in small sheaves in small stacks that are capped. If inside, it should be hung up in small bundles, in dry well-ventilated rooms.

For threshing a small rubbering threshers has given good results or it may be found advisable to thresh it out by hand.

In finally preparing the grain sample it is essential to obtain one with grains of similar size and shape. This can only be accomplished through a great deal of painstaking work trying different sieves, different cleaners, etc.—Free Press.

Creamery Butter Production In Prairie Provinces Shows Increase Over Last Year

Gatineau River

First Record Of The Name Of This River Appears In Year 1788

When Champlain in his ascent of the Ottawa River in 1613, reached what is now the state of the capital of the Dominion, on June 4, he noticed a tributary coming from the north. The river was the Gatineau. Champlain gives no name to it and as far as the Geographic Board of Canada is aware the first record of any name for the river does not occur till 1783. In that year Lieut. David Jones made a report to Governor Haldimand in which he mentions coming "to the River Lettineau (Gatineau), and from thence about a league to Shoadear (Chaudiere) Falls."

Named By Franklin

Bathurst Inlet and Coronation Gulf Named In 1821

Bathurst Inlet and Coronation Gulf were so named in 1821 by the celebrated Sir John Franklin, 1786-1846, who led his first overland expedition to the Canadian Arctic in 1819-22. The gulf was so named because it was the Coronation year of His Majesty George IV. The name Bathurst Inlet commemorates Henry, third Earl of Bathurst (1762-1834), who was, at the time the name was given, Secretary for the Colonies.

(By Annabelle Worthington.)

Work Carried Out Which Will Be Of Great Interest To Dairyman

The value of pastures depends very largely on the amount of proteins—green feed—available to the cattle using them. In this connection the studies of "close grazing" now being made by experts of the Dominion Department of Agriculture are of special interest. While still in the experimental stage the work already done holds much of interest for the dairyman. Briefly put, the object of close grazing is to provide an adequate and continuous supply of green fodder from succulent new herbage growth. This is done through the division of a suitable field area into four equal sections. While the herd grazes for a week on one section the new growth, rich in protein, is developing in the others. In this way a new pasture with three weeks growth of new herbage is regularly available.

British Railways Are Progressive

Having acquired control of much of the motor-coach transportation in the country, railways of England are preparing to capture control of air services. Under powers acquired last year, the railways may operate airways. As soon as the large cities are in position to provide centrally situated aerodromes the rail lines will be prepared to run their own aeroplanes for passengers, express and freight, in combination with the train and steamship services. The railways expect to have within a year at least an 85 per cent. interest in all motor coaches in the country.

A colorscope which matches colors more closely than the eye has been invented by a New York physicist.

The canvasback duck can fly at a speed of almost 100 miles an hour.

Singapore, British Malaya, is to have a skating rink.

How To Order Patterns

Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. Size

Name

Town

2550

A navy blue and white printed crepe silk of smart practicality reveals feminine influence in plain blue shoulder bow and bow tied sleeves. The tricky cross-over vestee of white silk pique adds distinction to its simplicity of line.

It's straight and slender to just over the knees, where the circular flounce starts to widen into flatter-furled at hem.

A narrow belt of the plain blue crepe marks the natural waistline. Style No. 2550 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Blue-violet wool crepe with vestee and bow trim of matching fallie crepe is chic.

Peach pink shantung, lime green flat crepe silk, daffodil yellow linen with white sheer linen, sailor blue pique dotted in white with plain white pique, coral-red chiffon and printed chiffon voile in black and white with plain white are charming suggestions.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

National Map Of Canada

Area Of Canada Is Greater Than That Of Europe

The area of Canada is calculated to be 3,684,723 square miles, an area greater than that of Europe. Of this area only a small fraction has been adequately mapped. The Topographical Survey, Department of the Interior, is engaged in mapping portions of the country and is issuing as rapidly as possible sheets of the National Topographic Map of Canada. During 1926 four such sheets were published, nine in 1927, eleven in 1928, and seventeen in 1929.

Agricultural Short Course

Course For Departmental Judges Held Annually At Guelph

A short course for departmental judges was held recently at the Ontario Agricultural College. Over 125 were present, including judges of ploughing matches, standing field crops, heavy and light hogs, beef and dairy cattle, and sheep and swine. Classes were started some 15 years ago, and are primarily to get judges together for purposes of demonstration so that a uniform standard may be maintained for judging at shows and competitions.

CANADIAN NATIONAL POLICE CHAMPIONS

Setting a record unequalled elsewhere in one year in winning trophies, the Canadian National No. 1 Revolver Team, of Winnipeg, in recent contests, captured the Dominion of Canada Pistol Championship; Drewry Cup; Manitoba Revolver Championship; Sir Daniel MacMillan Cup; M.D. 10 Championship; W. A. Murphy Prize; Canadian Revolver Association's Gold Badge, Highest Aggregate; Birks Medal, Highest Individual Record; Third Place United States Aggregate; Highest Aggregate D.C.R.A. Matches; Highest Record Score Provincial Police Championships; Highest Record Score Dominion Police Championships; Highest Record Score Dominion Open Championships. J. W. Brune holds the United States Intermediate Championship, while M. Ross, another member of the Canadian National team, holds the Novice Championship of Canada.

Says Churchill Is Real Port

American Visitor Is Much Impressed With Possibilities Of Northern Route

"Churchill has better prospects for a real port and a real city today than Chicago had when it was first started. The natural foundation for dock structures is stronger also." This was the statement of W. T. Miller, of Eldorado, Ill., veteran contractor of the northern states, made following his return from Churchill.

Mr. Miller is of the opinion the prospects for port facilities are 60 per cent. better and the cost of construction is 30 per cent. less in proportion to what it was at Chicago in the beginning of the city's history.

Mr. Miller was accompanied by John Vandyske, also of Eldorado, who has been a locomotive engineer on United States railroads for many years past. He has been in the railway service for 28 years altogether.

Mr. Vandyske says the roadbed on the Hudson Bay Railway is much better than he expected, and is of the opinion it is in excellent condition.

The two visitors said that when the Hudson Bay Railway is completed that tourists will flock to the north and that many will look over various prospects with a view of settling there.

Will Employ Many Men

C.P.R. To Engage Nearly 12,000 Extra Men On Extra Work

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's comprehensive program of construction, maintenance and improvement from coast to coast throughout the Dominion.

Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in extra gangs throughout its system.

The work itself is of a very varied nature, including branch line repairs and renovation of right-of-way, bridges, tunnels, stations, coal appliances and buildings of various classifications, including the erection of a new hotel by the Dominion Atlantic Railway at Kentville, N.S. The men in general are recruited at the closest point to the scene of work and are kept steadily employed until each job is completed, thus it may be seen that the Canadian Pacific is doing its full share towards the furnishing of employment wherever its system operates throughout the country.

Beef Grading

Doing Much To Strengthen The Demand For Better Qualities Of Beef

The beef grading policy of the Dominion Livestock Branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true qualities of beef, but is also attracting attention in the British market. The Imperial Food Journal, a recognized authority on market conditions in the Old Country says: "The introduction of beef grading in Canada, whereby the top two grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals before they are sent to market." The same authority forecasts an early return to volume exports of Canadian live cattle to Britain.

Automobile Accidents

The majority of automobile accidents are directly traceable to poor health of the drivers, according to a recent report made to the French Academy of Medicine. The commission has been appointed by the Academy to probe further into the study and exert pressure on the government to include a physical examination in the requirements for a driving license.

Yolkless Eggs

Winnipeg Hen Is Responsible For Strange Freak

The exact opposite of the goose of nursery rhyme fame that laid golden eggs is being enacted by a Winnipeg hen. Mrs. Russell McLeod is displaying yolkless eggs produced by this freak member of her pen.

She discovered the eggs were worthless when she started out to fry them her favorite style—"sunny side up."

Italy's craze for sports is growing.

"I'm on a diet; I hardly eat anything and only drink wine." "Well, wouldn't you like to come and have dinner at my house today?" —Pages Gates, Yverdon.

WORLD HAPPENINGS
BRIEFLY TOLD

British Columbia's recent lumber mission to Australia will seek co-operation of the provincial government in securing a lumber tariff preference in that dominion.

The Italian council of ministers voted an appropriation of 100,000,000 lire, or about \$5,230,000, to rebuild the stricken earthquake area of Middle South Italy.

Mrs. Sarojini Naidu, woman leader of the Indian Nationalists, is said by the Daily Herald to be willing to compromise with the government somewhat short of Mahatma Gandhi's demands for independence.

The London naval treaty passed through all its stages in the House of Lords and only needed the royal assent before becoming effective. The bill gives legal support to the pact entered into at the recent London naval conference.

The visible supply of American grain at the end of July shows the following changes in bushels: Wheat increased 14,503,000; corn decreased 278,000; oats decreased 905,000; rye increased 39,000; barley increased 276,000.

Premier Ramsay MacDonald announced in the House of Commons that the government proposed to invite the leaders of the two opposition parties to nominate a representative from both Houses to participate in the round table conference on India which will be held this fall.

Great Britain's unemployment total is nearing the 2,000,000 mark. It was announced by the Ministry of Labor. The official statement said that on July 21 the number of persons out of work was 1,972,700, an increase of 32,834 in a week and 850,575 in a year.

Brandon police are looking for the person who passed an American one dollar bill off on a local hotel for \$20. The bill was raised from \$1 to \$20 in this masterful style that the authorities are of the opinion that the counter might be flooded with the bills. The work is thoroughly done and it was only when the bill had received close scrutiny at the bank that the deception was caught.

Makes First Official Test

Premier Bracken Talks Over Radio Phone From Fil Flon To Winnipeg

From the staff house of the Hudson Bay Mining and Smelting Company at Fil Flon, Mr. Bracken and Bruce Bracken, his son held a combined radio and long distance telephone talk with Mrs. Bracken, Winnipeg.

The premier's conversation marked the first official test of the new radio phone system between Fil Flon and The Pas and the results were entirely successful.

Interesting Experiment

During recent experiments, Marconi has recorded air messages on a phonograph disc with perfect success. The experiment was made by the inventor while on his yacht lying near Genoa. The message was sent to Sydney, Australia, about 11,000 miles away. The recording was not only caught perfectly, but was re-transmitted from Sydney by wireless to the original sender.

Prefer Silent Films

Motion-picture fans of Denmark prefer the silent film and soft music to the sound film. Especially is this apparent in Copenhagen. The principal reason is apparently the linguistic difficulties, which the partial translation of texts has failed to overcome. Few Danes understand English.

Winnipeg Hydro Developments

J. W. Sanger, of the City of Winnipeg Hydro, states that, due to new developments and technical improvements that make it possible to transmit heavier voltages than in the past, it is now possible for Winnipeg to bring power from the Nelson River.

"Dear, dear! Trespassers will be prosecuted, and haven't got any money with me."—Lustige Sachse, Leipzig.

Chinese Stowaways

Party of Six Have Narrow Escape From Death When Vessel Is Fumigated

Efforts of six Chinese stowaways to enter Canada aboard the British freighter S.S. Benarty, failed when they reached New Westminster recently.

The sextette were fortunate to be alive after more than two weeks in a coal bunker aboard the ship, and especially after fumigation operations took place. By some chance deadly cyanide gas failed to reach the hold where the Chinese were hiding.

Officers who entered the hold declared it was a marvel they survived the ocean trip as it was probably worse than the famous "Black Hole of Calcutta." It was believed that Chinese members of the ship's crew kept their compatriots provided with food on the long trip.

The ship left Yokohama on July 4. After being arrested they were turned over to the Vancouver immigration authorities to await deportation.

Amended Grain Act

New Regulations Come Into Force On September First

By a proclamation in the current issue of the "Canada Gazette," the Grain act as amended shall come into force on September 1.

The act was re-written following recommendations made by the agricultural committee of the House of Commons, and was passed last session. A lengthy investigation of the operation of the act was conducted during the last two sessions of parliament and numerous amendments were approved. Several grades were given new definitions, clauses were inserted to prevent mixing of grades and the whole field of the act's operation was reviewed.

OUT DOOR LIFE CALLS
FOR NOURISHING FOOD

By AMY SMITH
Well Known Domestic Science Authority

Off for a day or a month—in the car or hiking, boating, fishing—after a few hours you will find FOOD looms up as the biggest thing in the world. Scenery, yes—but such appetites!

Of course milk, and plenty of it, is essential for nourishing, appetizing food—and for campers or picnickers Borden's St. Charles Brand Evaporated Milk is by far the best choice, providing plenty of pure, rich milk, regardless of weather conditions, rough journeys, out-of-the-way camping places—and lack of fire.

Because Evaporated Milk has had half the water removed, you can rely on its extra richness, which can be utilized to take the place of eggs or butter in many kinds of cooking. For instance, an old guide, famous for his fish fries, told me that in camp he always dipped the fish in undiluted Evaporated Milk before the final coating with corn meal.

When Evaporated Milk is used instead of milk in any recipe it should be diluted with an equal part of water. Remember that the simple rule and you will find it successful in your own recipes. To "cream" your coffee, use it undiluted.

Speaking of Fish— a "try pot" is used by Canadian guides for cooking large chunks. After dipping the pieces of fish in Evaporated Milk and the corn meal drop into the deep fat (very hot) and fry until brown. And, by the way, take care of the simple, seasoned camp cooks—a very little fire of the right kind in the right place (if because scattered from the wind) will do the job better than a face-blistering conflagration.

A savory fish chowder is always a welcome dish in camp and it's easily made with Evaporated Milk.

Fish Chowder

Cut the fish in chunks and remove as many bones as possible. Cover the bottom of an iron pot with slices of fat salt pork and fry out part of it. Remove part of the fat, and add the fish, then add a layer of sliced, raw potatoes, some sliced onions and a layer of fish. Cover with pieces of hard tack biscuit, and season each layer, scattering the salt, for the pork is very salty. Repeat the process until the pot is two-thirds full. Add just enough water to cover to level of the fish. Cover the pot and simmer one hour and one half, or until the potatoes and fish are tender. Add one tall can of Borden's St. Charles Milk. Bring just to boiling. Serve.

Hot corn breads to eat with the bacon, fish, or pork and gravy, are a huge success story in the open—or to begin the day.

Cornmeal Flapjacks
1 cup cornmeal.
1 cup flour.
4 teaspoon baking powder.
1/2 teaspoon salt.
1 cup Borden's St. Charles Milk.
1 cup water.
2/3 tablespoons melted fat (bacon fat may be used).

Mix and sift the dry ingredients. Add the milk, diluted with water, and beat well. Add the fat. Bake on a hot, greased griddle or frying pan. Turn a little, and cook until the wheat griddle cakes.

Camp Corn Dodgers

Put one quart cornmeal into a bowl. Make a hollow in center of meal and into this put one tablespoon lard and one teaspoon salt. Pour over this equal parts Borden's St. Charles Milk and water, heated to scalding point, stirring all the time until a dough is formed which can be molded with the fingers, or slightly, form into cakes and cook slowly on a well greased griddle. (The quantity of diluted milk needed depends on the kind of cornmeal used.)

Lost Purse Is Found

Pocketbook Lost Eight Years Ago Is Recovered In Corn Field

A pocketbook containing \$35 lost eight years ago, was recently recovered by the loser. Back in 1922 Jacob Slagh, a Michigan farmer, was assisting his brother-in-law, Koene Vanden Bosch, harvest hay and lost his pocket-book. Vanden Bosch while cultivating corn in the same field spied the purse, so worn it fell apart when handled. It was carefully kept together and brought to its owner who turned it over to the United States treasury department for redemption of the currency it contained.

Faster 'Planes

Commercial 'planes of the future will have to be considerably faster to suit Lieut. Alford J. Williams, American speed ace. "If 130 or 150 miles an hour were to be the top speed we could hope for in commercial aid transportation. I would suggest that the public cease to waste its time on aviation and that they hereafter look upon it as a hobby," he says.

Takes Brains To Be A Farmer

"It takes more brains to be a farmer than to be a High Court Judge," asserted J. Lockie Wilson, speaking at a gathering of Provincial fair judges at the Dominion Experimental Farm, Ottawa, recently. There never was a greater need for co-operation between the scientist and the farmer than today," he also stated; adding, "the most scientific business today is farming."

CANADIAN ACTRESS

Miss Rita Davies, Canadian girl of Toronto, who has signed a contract to play in a new dramatic production on the "Great White Way," going into rehearsal in about two weeks time. Miss Davies is a former Hart House player. She attended Bryn Mawr school here.

B.C. Hydro Possibilities

Greatest Water Powers In Canada Can Be Developed At The Coast

The greatest water powers in Canada, greater even than those harnessed along the St. Lawrence, have been revealed along the coast of British Columbia, north of Vancouver, by government engineers, during the past summer. It is stated at parliament buildings, Victoria.

Preliminary reports indicate that in addition to the noted Taseco-Chilko Homathko power, with a possible development of 1,200,000 horsepower, two other sources of electricity discovered bring the possible development of the coast district up to the huge figures of 3,000,000 horsepower.

The third project calls for the diversion of the Chilko waters westward to the sea by the Homathko River.

Wheat Pool Elevators

Up to July 16, 1930, the percentage of Pool Wheat delivered to the Saskatchewan Wheat Pool and passing through Pool Country Elevators amounted to 87.12 per cent, leaving only 12.88 per cent, as having gone through Line Elevators. The corresponding percentage of grain through Pool Elevators at the same date last year was 74.60 per cent.

Chefoo consular district in China has a good roads campaign.

SUNDAY SCHOOL LESSON
AUGUST 10

HANNAH "A GODLY MOTHER"

Golden Text: "My son, hear the instruction of thy father, and forsake not the law of thy mother."—Proverbs 1:8.

Lesson: 1 Samuel 1:1-28; 2:1-11, 18, 19, 30, 35.

Devotional Reading: Luke 1:46-55.

Explanations and Comments

Hannah's Prayer For a Son, Chapter 1:9-11.—Hannah and her husband Elkanah went regularly every year to the Sanctuary at Shiloh, there to worship and offer sacrifices as one of the great religious feasts, probably "The Feast of Ingathering," or "Feast of Tabernacles," which was held after the grape and olive harvest.

As was customary, after a portion of the sacrificial victim was burnt at the altar, and another portion handed to the priests, the family partook of the rest with their customary precincts. But Hannah could not eat, for sad and bitter thoughts filled her mind as she contrasted her childless lot with that of Peninnah, Elkanah's other wife, who was blessed with many children. After the man was over she presented herself in the temple to pray to Jehovah. Her prayer was accompanied by many tears as, crying with her hands raised, she made her vow that if Jehovah would bless her with a boy, she would consecrate him all the days of his life to Jehovah, and he should be a Nazirite, one set apart to the Lord, of which his unshaven head would be a token. The characteristic marks of the Nazirite were the refraining from wine and all intoxicating drinks, the letting the hair grow, and the avoidance of defilement by corpses.

The Answer To Prayer, 1:19, 20.—Hannah returned to her home in Ramah. When she was made happy by the coming of a son, she named him Samuel, "Because I have asked him of the Lord." Hebrew scholars tell us that the word "Samuel" has no connection with the Hebrew word for "asked," and they connect the first part of the name with the Semitic root for "name," taking Samuel to mean "Name of God."

Hannah gives her Only Son To the Service of Jehovah, verses 24-28.—When Hannah weaned her boy, he was probably three years old, she brought him to the house of the Lord in Shiloh. She brought also an offering, as the law required for the firstling of a female bullock, a bushel of meal and a bottle of wine.

Hannah made herself known to Eli the priest by recalling the time when he had seen her praying in the sanctuary, and then she presented the boy for whom she had prayed.

Ontario Grain Pool

Announcement has been made by the Ontario Grain Pool that the initial payment to members is based on 65 cents per bushel for numbers two wheat, and 29 cents per bushel for number two white oats and barley at milling grade. With maximum deductions of local handling the payments net growers 60 cents and 25 cents.

Shortage Of Small Coins

French business men recently complained to the Ministry of Finance that there was an insufficiency of 50 centimes (approximately 2 cents) pieces in circulation and demanded a new stamp. The ministry estimates that there are 448,000,000 50 centime-pieces in circulation.

Feat Of Mountain Climbers

Eight Peaks Over Ten Thousand Feet High Are Negotiated

Eight peaks over 10,000 feet high, three of them unnamed, in the upper region of the Athabasca River and behind Mahanah Lake, where the Canadian Alpine Club assembled at its annual camp, were reported to have been climbed for the first time with the return, after an absence of 17 days, of a party led by Dr. Max Strumia, of Philadelphia, and Dr. W. R. Hainsworth, of New York.

Accompanied by Newton Waffa, of Orange, N.J., and John F. Lehmann, of Everett, Mass., Strumia and Hainsworth first climbed Mount Christie, 10,180 feet high, from a high camp on Fryatt Creek. Later, climbing Mount Belanger, 10,200 feet in altitude, they were within 50 feet of being swept to their death by avalanches and on their descent were held for three hours on a rock ledge till the descending sun rendered snowfields improbable and their progress less hazardous.

An unnamed peak near Mount Wolley, whose altitude is placed at 10,700 feet, offered the greatest difficulty. Only by inserting "petons,"—iron spikes by which they could attach their climbing rope—into the crumbling rock, were they able to attain its summit.

Climbing from the site of the Canadian Alpine club on Maligne Lake, they made the first ascent of three peaks of Mount Maligne, all over 10,000 feet in height, and mapping the first of the tremendous ice fields surrounding it.

Dr. Strumia, who has climbed in Switzerland, France, Italy and North America, a total of 75 peaks and 23 first ascents, said recently that during the trip just completed he had been inspired by the experience of some of the most difficult rock and snow work he has yet encountered. The party was outfitted by "Curly" Phillips.

Humane Association Awards

Two Westerners Are Honored For Life Saving Deeds

At a meeting of the board of investigating governors of the Royal Canadian Humane Association, awards made included: Alexander Branch Quayle, Lady-smith, Nanaimo, B.C., for the rescue of Thomas Atkinson from drowning, April 15, 1930. Samuel Rutherford, 1533 Retalack Street, Regina, Sask., for the rescue of Harry Hine from drowning, July 11, 1929.

Latest Dodge In Paris

Launching books like ships is the latest dodge in Paris, to push sales. In the presence of friends and admirers, the author breaks a bottle of champagne over the first copy of his work to be formally placed on sale.

The Russian government has begun work on a scheme to dam the Dniester River to obtain 350,000 horse-power.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN
YOUR LOSSES
BY INSTALLING
WINDOLITE

Canadian breeders of poultry and live stock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

GIANT DIRIGIBLE R-100 REACHES ST. HUBERT PORT

Montreal.—After a weary wait, Great Britain's giant threat for the supremacy of the skies, hovered over St. Hubert airport, early on Friday, August 1st. Just a little over three days after leaving Cardington, England, the R-100 reached the mooring mast, marking the end of the trans-Atlantic flight. Fabric trouble caused a delay of several hours, and cut down the speed after reaching the Gulf of St. Lawrence.

As newsmen and ground crew awaited, the dirigible was first sighted 10 miles northeast of St. Hubert at 2:04 a.m. Eastern Daylight Saving Time, and was travelling slowly east toward the illuminated landing field. Half an hour later the dirigible, silvery silhouette, was seen barely moving, at an altitude of about 500 feet above the ground.

The final appearance of the sky-wanderer after many hours of waiting, was the signal for an outburst of cheering from those at the airport. Behind the high fence surrounding the field, too, were perhaps a thousand people who have braved first a scorching day, then a wind-storm and rain.

It was not the first time the R-100 had experienced trouble with its fabric skin. On its first extended flight over England the fabric tore on the tail surfaces and the rear portion of the ship was rather extensively remodelled in an effort to prevent a recurrence of the mishap.

The ship stopped over the Island of Orleans for two hours while repairs were made to the damaged fabric on her fin. The cloth was torn while the big airship was almost within sight of Quebec.

A large square flap of loose fabric was noticed in the top of the envelope. Captain Henry St. Martin, of Montreal, pilot of the "movie" plane flew within some miles of the airship and noticed that she was barely holding her head in the wind.

"There seemed to be a tear in the top of the bag," Captain St. Martin said. "She hardly seemed to be moving."

She seemed almost to drift by Quebec, the noise of her motors being hardly audible from the ground.

Soon after passing the Quebec bridge the R-100 opened up her engines and her speed appreciably increased. She was flying at about 1,000 feet.

The shores of the St. Lawrence in the neighborhood of the villages were crowded with people hoping to get a glimpse of the monster as she sailed by on the last leg of her trip.

Imperial Conference

Premier Ramsay MacDonald says Problems Of Unprecedented Difficulties To Be Faced

London, Eng.—The Imperial Economic Conference must face constitutional problems of unprecedented difficulty, Premier J. Ramsay MacDonald told a meeting of the United Kingdom Branch, Empire Parliament Association, in Westminster Hall, recently.

The year is going to be one of the great, deeply marked years in history, thought the premier. Whoever had the responsibilities connected with the Imperial conference would be only secured by skillfully practising the art of blending lessons of the past with the outlook on the future. While believing in party government, he felt an attempt should be made to get Imperial questions considered first by all parties.

After all, he declared, the commonwealth and the nations which compose it are very much greater, than any one party.

Declined To Receive Deputation
London, England.—A parliamentary committee appointed to deal with grievances of Indians in Canada, informed a delegation of Six Nations Indians from Brantford, Ont., that Rt. Hon. J. H. Thomas, Minister of Dominion Affairs, had declined to receive the deputation on the ground the grievances claimed were a matter for consideration by the Canadian Government.

Body Of British Flyer Is Found
London, England.—The Evening News carried a despatch from Rangoon which said the body of the British flyer, Eric Hook, when found in the jungles of Burma, was little more than a skeleton. It apparently had been terribly mauled by a leopard or a tiger. Hook was lost when his plane was forced down on an attempted flight to Australia recently. His partner was saved.

W. N. U. 1849

CANADA'S PREMIER-ELECT

Hon. R. B. Bennett K.C., Conservative Leader, whose party swept into power at the recent general elections.

Improved Crop Conditions

Betterment During the Past Week Is Reported In Some Areas

Ottawa, Ont.—Crop conditions have improved, particularly in central Saskatchewan and Alberta, according to the weekly crop report issued by the Dominion Bureau of Statistics. In Manitoba there has been an increase in severity of stem rust infection, some stands in the central and southern sections of the province having infections ranging from 30 to 75 per cent.

The report continues: Western weather since our report of July 24, has been hot, with scattered showers and some good rains. Precipitation was deficient in southern Manitoba, in central Saskatchewan, and in central and northern Alberta over much the same territory which received beneficial rains during the previous week. The first low temperatures of the harvest season were recorded from northern and southern stations of Alberta and from Vidora, Saskatchewan.

Crop conditions show a further betterment during the week, particularly in central areas of Saskatchewan and Alberta. Frosts, sufficient to blacken potatoes, are reported by the Beaver Lodge sub-station, in the Grande Prairie district. Since from one to seven degrees of frost were recorded, some damage to grain will result, although the extent cannot be determined. With favorable weather conditions, stem rust infection shows a serious increase on the leafy, late bread wheat of Manitoba, with only slight increases on the lighter stands of Saskatchewan wheat.

The full text of the wire from the Dominion rust research laboratory at Winnipeg is as follows:

"Weather conditions were favorable for stem rust development in past week. Decided increase in severity of infection on common wheat throughout Manitoba. Some heavy stands in central and southern Manitoba have infections ranging in severity from thirty to seventy-five per cent. Injury already apparent in certain fields of this area. Light stands much less affected. Some fields of early variety ready to cut in about a week. Only traces rust on durum wheat. Stem rust increasing on barley, severity now ranges five to twenty-five per cent. No decided change reported in rust situation of north-eastern Saskatchewan on July 25. In south-eastern Saskatchewan rust has increased with severity of infection ranging from one to six per cent. on wheat and barley and pustules appearing on necks of plants. Leaf rust found on wheat in Alberta, but no stem rust yet reported."

U.S. County Judge Sent To Prison
New York.—W. Bernard Vause, who as county judge in Brooklyn, was noted for the severity of his sentences and who once recommended the whipping post for criminals, was sentenced to six years in federal prison. Judge Vause was found guilty of using the mails to defraud in the conduct of the defunct Columbia Finance Corporation.

Report Massey Has Resigned
Toronto, Ont.—The Mail and Empire in a news feature says: "Hon. Vincent Massey is understood to have forwarded to Rt. Hon. W. L. Mackenzie King his resignation of the post of Canadian High Commissioner to Great Britain and to have asked that Hon. R. B. Bennett be so advised."

Protest Against Use Of Liquor
Washington.—A protest against the use of liquor at the British embassy has been received by Sir Ronald Lindsay, from Samuel B. Woods, former Mayor of Charlottesville, Va., and an ardent dry.

BENNETT WILL PROCEED TO FORM HIS NEW CABINET

Ottawa, Ont.—A special session of parliament—probably on or before September 11—is a certainty. Carrying out his promise to the Canadian people to deal with unemployment "immediately after July 28," Premier-elect Hon. R. B. Bennett is already taking action in this direction as the first step towards the implementation of the pledges he gave during the recent campaign.

Tuesday, September 2, looms as the probable date for by-election day if any minister selected by the Conservative chieftain to serve in his administration happens to be opposed.

By-election writs will likely be issued as soon as Mr. Bennett takes office as Prime Minister, with nomination day likely set for August 18, in case any chosen minister represents a constituency in which, under the Dominion Election Act, two weeks must intervene between nomination and polling day. The majority of constituencies will require the intervention of seven days.

Probable cabinet selections are the chief topic of discussion among political observers in the capital. In addition, speakers of both the House of Commons and the Senate will have to be appointed. By reason of his ill health, Hon. Hugh Guthrie (South Wellington), may be made speaker of the Commons, or George Black (Yukon), may be chosen. If his health, however, is considered to permit his undertaking more arduous duties, Mr. Guthrie will probably be appointed to the cabinet.

Hon. R. J. Manion (Fort William), is another very probable selection. Dr. Manion was postmaster-general in 1928. Hon. J. D. Chaplin and Hon. E. B. Ryckman are prominently mentioned for other cabinet posts. For the province of Quebec, Sir George Perley (Argenteuil), former Canadian High Commissioner in London; Maurice Dupre, who defeated Gerard Lacroix, in Quebec West; Arthur Durnaneau, victorious Conservative candidate in Chambly; Verres, and Arthur Sauve, former Conservative leader in the Quebec legislature, are mentioned.

Premier E. S. Rhodes, of Nova Scotia, and W. G. Ernst, elected in Queens-Lunenburg, are possible appointees from Nova Scotia; in Prince Edward Island, Hon. J. A. MacDonald or J. H. Meyers continue to be mentioned for the cabinet. For the speakership of the senate, Hon. C. P. Baubien, Montreal, who was joint chairman at the 1927 Winnipeg convention of Conservatives, is a possible appointee.

Has Nothing To Say

Winnipeg, Man.—Hon. T. A. Crevier, Minister of Railways, who was defeated in Brandon constituency in the federal elections, said he "had nothing to say" regarding possible plans for his return to the House by a by-election in some constituency.

"A Great Deliverance"

St. John, N.B.—Hon. J. B. M. Baxter, Premier of New Brunswick, discussing the Dominion election result said: "I think Canada has sustained a great deliverance."

GOVERNOR-GENERAL VISITS FIRST CANADIAN HEALTH UNIT

This picture was taken when Their Excellencies Lord and Lady Willingdon visited the County Health Unit in Beauveville, Quebec. This Health Unit was the first to be formed in Canada and has been operating on full time for a number of years with great benefit to the surrounding communities. A motion was made in the House of Commons during the last session asking the Canadian Government to consider subsidizing these small full-time medical departments in rural communities from coast to coast.

SEES TROUBLE BREWING

Jas. W. Gerard, U.S. ambassador to Germany under President Wilson, who upon recent return to New York from Europe, declares war is brewing between France and Italy.

Emphasizes Independence

Premier Hertzog Says South Africa Has Right To Secede From British Commonwealth

Pretoria, South Africa.—Emphasizing the complete independence of South Africa and her right to secede from the British Commonwealth of Nations if she ever in the future desired to do so, Prime Minister James Barry Hertzog delivered an important speech on the eve of his departure for the Imperial Conference in London, England.

"No iota or tittle of our independence will be sacrificed," he said. "I am convinced we possess complete independence. The people of South Africa will be prepared to an ever-increasing extent to heartily maintain co-operation with Great Britain and the other Dominions. But co-operation will depend on national independence. In no circumstances may the right to secede from the British Commonwealth be taken from South Africa."

India Boycott Continues

Agitators Plan To Intensify the Civil Disobedience Campaign

Bombay, India.—With plans for stiffening the boycott against British goods and intensifying the civil disobedience campaign believed to be its principal agenda, the working committee of the All-India Congress opened its sessions recently.

Only ten of the committee members were present, 21 being in prison on various charges preferred by the government. The sessions, held behind closed doors, were expected to continue three and possibly four days. Vallabhai Patel presided.

Members of the committee said the peace plans of Sir Tej Bahadur Sapru and M. Jayakar probably would not be considered. They added that the negotiations certainly would not influence the committee's decisions.

Party Standing

Toronto, Ont.—The Canadian Press summary of the standing of the parties in the Dominion elections is as follows: Conservatives, 138; Liberals, 86; U.F.A., 10; Progressives, 2; Liberal-Progressives, 3; Independents, 2; Labor, 3; doubtful, 1; total, 245.

Chinese Pillage Homes

Communists Loot and Burn Foreign Holdings

Shanghai, China.—In the most serious devastation of foreign property in China for many years, Communists looted and burned all or nearly all foreign holdings at Changsha, capital of Hunan province.

Foreigners generally were safe aboard British, United States and Japanese gunboats, five miles down the Siang River. Four missionaries who elected to remain in the city were unaccounted for.

Changsha was divided into 50 districts for pillaging. Directed by leaders, the despoilers carried foreign effects into the street as plunder before firing the buildings. Coolies looking on were harangued by the Red leaders, and many were persuaded to join the Communist army to seize a share of property "wrongfully possessed by the upper classes."

Despatches said foreign consulates, residences and large office buildings on Shullu Island opposite the city probably would be destroyed.

Value of foreign property already burned amounted to millions of dollars. The total could not be estimated.

Saskatchewan Egg Pool

Increase In Prices Over Those Paid In 1929

Regina, Sask.—An increase in prices over those paid for the same period in 1929 is noted in the final payment of the Saskatchewan Co-operative Poultry Producers Ltd., or Egg Pool, cheques for which are now being prepared at the head office here. This payment covers the second pool of the year, which closed Saturday, July 19.

The prices being paid are: Extras, 22 cents; first, 19 cents; seconds, 17 cents, and crax, 15 cents. They are net cash, f.o.b. shipping point on freight shipments.

NATIONAL WORKS GO ON UNDER NEW GOVERNMENT

Ottawa, Ont.—The tide of party success ebbs and flows but the great task of undertaking of this Dominion go on. Several governments have come and gone since the work was first started on the Welland ship canal. It was to have been officially opened on July 1, with a Liberal ministry directing. This formal ceremony had to be postponed and now a Conservative government will be in office for this historic event. It is not expected the date for the opening will be fixed for some time.

In the case of the Hudson Bay Railway, the driving of the last spike was planned for last fall but these plans were changed. It was decided to have the celebration on the occasion of the opening of the ocean route rather than at the completion of the railways, so it will likely be next year. Therefore, the new government will still be in office at the completion of these works started many governments ago.

The probability is that the new ministry's greatest undertaking will be the St. Lawrence River deep waterways. This prospect makes the portfolio of Minister of Railways and Canals one of the most important in the government, even more because of the canals than the railways. That is why many people in this city are expecting Premier Howard Ferguson to be the one selected to fill that position.

It is interesting to trace the lives of governments alongside such works as the Welland ship canal or the Hudson Bay Railway. The first contracts for the railway were let by Rt. Hon. George P. Graham as Minister of Railways and Canals in the Laurier Government, in 1910. This was for one section. Then the government of Sir Robert Borden came into office and the contracts for two other sections were let by the Conservatives. Nelson was then the objective.

Work proceeded through the Conservative tenure of office and into the time of the Unionist regime. It was discontinued in 1918 because of the stress of the war. The government of Mr. Meighen came after that, and in 1921 the government of Mr. King took office. In 1926 the terminal was shifted from Nelson to Churchill, and the railway to that point was completed last year. The port construction and the aids to navigation are in course of construction.

The work on the Welland Canal was started under the Borden government, in 1913, and continued until the war stopped it in 1917. It was started again under the Unionist government late in 1918 and has been continued ever since.

MANY CHANGES IN PORTFOLIO OF IMMIGRATION

Ottawa, Ont.—Who will be the next minister of immigration? Many names are being suggested. Some think Hon. Robert Rogers will get the post. With the change of government the conference on immigration will not likely be held at least until after the Imperial Conference.

Immigration has had more variety in the matter of bosses during the last ten years than any other department of the government. Before 1921, Hon. James Calder was minister of immigration. Previous to the elections of that year however the cabinet was reorganized and Hon. Dr. J. W. Edwards took over that portfolio. He was defeated at that position in the Meighen Government was beaten.

In forming his ministry, Premier Mackenzie King first gave the immigration portfolio to Hon. Charles Stewart along with Interior. In 1925 however, Hon. James A. Robb took over the portfolio. It was the reorganization of the cabinet before the 1925 election. Hon. G. N. Gordon was then made minister of immigration. He met defeat in the election and the department came back to Hon. Charles Stewart.

During the brief Meighen regime in 1926, Hon. Dr. Manion was minister of the department for a short time and then Sir Henry Drayton. With the return of Mr. King's government, Hon. Robert Forke became head of the department and remained in that position until December 1929, when he went to the senate and the job came back to Mr. Stewart once more. The present minister is Hon. Ian Mackenzie who was named last month. The election campaign kept him in the west and papers of which he had to pass were forwarded to him there. Now there will be a new minister or two in the life of the immigration department. There have been ten changes in nine years and another one coming.

Change Permit System

New System Of Liquor Permits To Be Introduced In Ontario

Hamilton, Ont.—Introduction of a new system of liquor permits under which the sale of liquor will be designated in dollars and cents, was announced by Sir Henry Drayton, chairman of the Liquor Control Board, at the convention here of the Chief Constables Association of Canada.

The change of the measures definitely decided upon to curb the abuse of liquor purchasers by recognized permit holders in Ontario.

Queried by a delegate, Sir Henry admitted there were faults in the present Ontario system, but, he declared, "I do not think we ever will have the free sale of beer in stores or in parlors."

A dangerous criminal sought in connection with a major crime usually is safe in jail while serving a nominal vagrancy charge. This was the message brought by Chief Mart. S. Wigle, of Windsor, in a paper advocating for police departments the privilege of taking fingerprints and photographs of persons held on charges of vagrancy.

Want Wider Markets

British Columbia Lumbermen Look To Britain For Sale Of Products

Victoria, B.C.—Urging a greater participation in the British markets by B.C. lumber and other products, a delegation was sent to the Imperial Economic Conference in the fall to further this aim, a delegation representing the lumbermen of the province waited on Premier S. F. Tolmie recently.

The lumbermen described conditions in the province as being exceedingly unfavorable at the present time. Prices were falling and demand was shrinking. The British market was the only one which showed possibilities of expansion.

Wheat For China

Surplus Wheat From United States May Go To Famine Stricken Areas

Wakfield, Kansas.—Senator Henry J. Allen, of Kansas, in an address here said prospects were more hopeful that some of this country's surplus wheat would be sent to the famine districts of China.

President Hoover and Chairman Alexander Legge, of the Federal Farm Board, the senator said, are studying the possibilities of distributing wheat in the famine areas through the co-operation of the Chinese government.

World's Largest Aerial Fleet

Twenty-Six Airplanes Engaged In Aerial Work For Government

Twenty-six airplanes, working in thirteen detachments, are now engaged throughout Canada in aerial photography and surveying for the Canadian Government.

For the past few years Canada has been the leader in the work of taking photographs from the air for map making and in making aerial surveys of large areas of practically unexplored territory. This year's program of such work has the world's largest aerial photographic fleet on the task. Before the end of the season probably at least another hundred thousand square miles of country will be recorded on photographic negatives.

As in recent years the Forest Service of Canada will continue to carry on the work of forest fire protection in the provinces of Manitoba, Saskatchewan and Alberta, for the season of 1920, and for this purpose has arranged to continue the co-operative arrangements which it has had in the past with the Royal Canadian Air Force. In these three provinces the area over which the air patrol work is carried on approximately 100,000 acres, of which a large portion is unimproved. For this purpose 21 seaplanes and flying boats will operate to detect and suppress forest fire outbreaks. These machines will be capable of carrying greater loads than in other years and their better performance should add greatly to the efficiency of fire-fighting operations.

Of the thirteen detachments engaged in aerial photography and surveying one is operating in British Columbia; one in Alberta; four in Manitoba, Saskatchewan, the Northwest Territories; four in Ontario and Quebec; one in the Maritime Provinces; one has been assigned to special transportation work such as carrying surveyors, explorers and other officials into accessible regions, and another to the exploration and photography of the main aerial routes in the Far North. The experience of the last few years has shown that at least for many years aerial transportation will be almost the sole means of communication throughout these vast and little-known areas. The exploration of safe-flying routes is, therefore, regarded as one of the first considerations towards opening up this country.

Furriers Use Cat Skins

Demand In London Results In Loss Of Household Pets

English folk are mourning the mysterious disappearance of pet cats, and it is all because Dame Fashion has decided that every well-dressed woman must possess a fur coat. These with small purses and stiff, enormous sums, and so a cheap fur has had to be found to meet the situation. The cat poachers creep round the streets looking for stray cats. When they find a victim, it is chloroformed, pushed into a sack and then taken to their clearing station. There the unfortunate animals are killed and skinned, and their skins are taken off to the dealer. The West End of London has been the chief area for the poacher's activities, but now reports of the strange disappearance of cats are coming in from all parts of the country. So cat owners should be on their guard lest their pets, too, are spirited away by poachers.

Was Adam a Chinaman?

Scientists claim discovering further evidence that Adam and Eve were Chinese, and that the Garden of Eden is to be found in Central Asia. This is based upon reports from Dr. Davidson Black, of the Peking Union Medical College, that he has unearthed skulls having jaws and teeth of men who very likely lived 500,000 years ago in the pre-Neolithic days.

Outboard motors are now equipped with electric starters.

"I give board and lodgings and £3 a month. Will that suit you?"
"Yes, ma'am, if it suits you for me to come only three days a month."—Pages Gales, Yverdon.

W. N. O. 1849

The Old-Time Doctor

Medical Fees and Prices Of Operations Show Little Change In Last 100 Years

Proof that medical fees and the price of operations have changed very little in the last 100 years is contained in the interesting tariffs of medical fees for the years 1839, 1865, 1874, recently on exhibit at the Ontario Medical Association convention.

A schedule of medical fees adopted at a meeting of the medical profession at the hospital in Toronto on February 14, 1839, quotes the minimum doctor's fee in the daytime at 5 shillings, or approximately \$1.25. Pulling teeth was extra. Each extraction cost 2 shillings, 6 pence, or 62 cents extra. In addition, a doctor could charge 5 shillings a mile travelling expenses for country cases.

The mileage was to be computed from the market buildings in Toronto. Bleeding, then common, also was the same price as the extraction of a tooth. A major operation cost £10, or \$50, and a minor operation brought fees of from \$5 to \$15. From 9 a.m. to sunset, in 1835, fees were settled at \$2 maximum, and \$1 minimum. But after sunset, a physician anywhere from \$2 to \$8. He got from \$40 to \$200 for a major operation, and from \$2 to \$40 for a minor.

Had the Password

Invited Guest Admitted To Restaurant But Host Excluded

A short time ago an ex-New Yorker, returning from some years abroad, decided to revisit some of the haunts of his youth, among others a small Italian restaurant downtown where he remembered getting delicious spaghetti. He telephoned an old friend, gave the address and description of the restaurant as it had been when he knew it, and arranged to meet there for dinner. On reaching the place, however, he found it strangely changed; the house grim-looking, the windows heavily curtained, the entrance apparently down stairs. He rang the bell, a man peered out at him, and an unfortunate scene ensued, in which the gentleman expostulated, told of past days there, described the old proprietor—all to no avail; the door slammed shut again. He hurried back to his hotel, to telephone his friend, apologize, and arrange another meeting place. It was not, however, until nearly midnight that his friend responded, explaining that he had been waiting in the restaurant, dining and all that time. "But how did you get in?" the other demanded. "Why, I just gave your name," the friend explained, in surprise. "They let me right in."—New Yorker.

Building the Silo

Details Of Construction Of Three Types Of Silos Now Available

In building a good silo the principal points to be considered are: The walls should be impervious, strong, smooth, and wind resistant. There are three principal types of silo—the monolithic concrete, the stave and the scantling, and their construction presents no particular difficulties. Complete specifications and detailed instructions with respect to the construction of silos of these types are available without charge in pamphlet No. 118 (New Series), now available through the Publications Branch of the Department at Ottawa.

Poem Became Famous

Mrs. Rose Hartwick Thorpe of San Diego, California, author of the famous poem "Curfew Shall Not Ring Tonight," celebrated her 80th birthday on July 18. Mrs. Thorpe wrote the poem when she was 16 years old. It was first published in 1870. The editor wrote to her saying he could not pay for her verses, but that he would offer her a year's subscription to his newspaper. The poem met with instant favor and was reprinted throughout the country.

Labor Parties Get Together

The national executive of the Labor Party and the administrative council of the Independent Labor party met in the British House of Commons to discuss the relations of the two bodies. It was decided that Rt. Hon. Arthur Henderson, of the Labor Party, and James Maxton, of the Independent Labor Party, should draw up formula with which the two organizations can work together.

The fruit of the so-called cream tree, grown in Sierra Leone, Africa, forms a most excellent cream.

Some of the detours are not even paved with good intentions.

Rust Research

Plant Pathologist From England Will Devote Year To Investigation Work In Canada

W. A. R. Dillon-Weston, M.A., advisory plant pathologist of the School of Agriculture, sailed from England for Canada, to spend a year with headquarters at the Dominion Rust Research Laboratory at the M.A.C. Dr. Dillon-Weston's exchange with Mr. J. H. Craigie is made possible by the assistance of the research committee of the British Empire Marketing Board.

On arrival in Canada, Mr. Dillon-Weston will visit the various plant pathology laboratories and the experimental farms in the east, and will be the guest, for a time, of Dr. Archibald at the Central Experimental Farm, Ottawa, and will then come on to Winnipeg where he will study the work done by the laboratory here in connection with the stem rusts of wheat and the breeding of rust-resistant wheats.

Mr. Dillon-Weston is widely known for his investigational work in the general field of plant pathology and more especially in connection with his work on stinking smut on wheat.

He has, for a considerable time, been associated with Sir Henry Tiffen, known the world over for his work in plant pathology, and who is the recognized leader in pioneer work in regard to stem rusts of wheat.

The faculty of the Dominion Research laboratory here are looking forward with keen pleasure to meeting Mr. Dillon-Weston and hope to make his year in Canada as interesting to him as they feel assured Dr. Craigie's year will be in Great Britain.—Free Press.

Pure Swank

The Days Of The Monocle Are About Over

Monocles, long the trade mark of the stage Englishman, are rapidly disappearing in their homeland. One sees very few single glasses in Britain these days. They are worn mostly by college lads who use plain window glass, and by old-timers who acquired the habit back in the good old Victorian days and can't cast it off now. Ask the monocled one why he wears it, and he will tell you that he has one bad eye. If you know him well, and press further, he'll admit it is pure swank.

Perils To Trees

Leakage of electric current from high-power transmission lines often causes serious injury to trees, according to department tree specialists. "Another common type of injury to trees and shrubs is scorching or burning as a result of the plants being where whitewashed or light-colored walls reflect the heat of the sun. Other types of tree damage are caused by dense shade or too intense sunlight.

Four pairs of twins who attended a school at Mussell Hill, London, England, have all won scholarships.

Adopt Pale-Face Son

Mark Poucette, Stony Indian brave and star performer at "Indian Days" celebrations at Banff, each July, and his wife, were heartbroken in 1914, for they had lost their three sons and were childless. The last of them, John Poucette, had been a particular pal of Dave White, son of a pioneer merchant of Banff, Dave White, Sr., who has been dealing with the Stony Indians for years and is highly respected by the tribe. In 1915 the bereaved Indian parents asked Mr. White if they might "share" his son. He agreed, and Mark Poucette, in a simple but touching ceremony, christened little Dave "John Mountain Stony" and declared "he now my boy too—he now my son." That was fifteen years ago and little Dave is now a grown man. He is shown in a magnificent head-dress made by Mrs. Poucette, together with his foster-father, outside the Poucette's tepee.

A Radiant Impulse

Interesting Experiment Conducted At the Edmonton Exhibition

At the Edmonton Exhibition, Alberta, an interesting phenomenon of radio drew large crowds to the Journal Broadcasting Station of C.J.C.A. situated on the Midway. By placing one's hand in front of a small microphone, owing to the electrical capacity of the body, there was observed a curious action. A lighthouse lamp was immediately set alight, while a tiny electrical train began racing round on a small track. On the withdrawal of the hand the light went out and the train ceased.

Hundreds of people, and thousands of children made this remarkable experiment and demonstrated a profound truth regarding their own bodies of which they were doubtless unaware, the unconscious influence which each and everyone is capable of exerting.

Today the world is measuring its light and sound by wave lengths, and scientists are agreed that the healthy man and woman are in reality benefactors of mankind through the radiant impulses which emanate from a body attune to the laws of health and vigor. But it works both ways for while the strong, robust, wholesome person is a blessing to himself and others, so the sick and diseased are a positive danger all round, lowering the morale and creating a physical discord which is harmful to young and old alike. Disease is an invading force, and in the future to be off well no doubt be reckoned as an offense against society and dealt with accordingly. On every hand one sees the gospel of prophylaxis or prevention is being published from the house, and taking the bull by the horns men are forcing the enemy to retire by maintaining their highest peak of health resistance to disease. The Red Cross of today has a great part in the health education of the young by the distribution of health literature, by lectures and radio talks in the province of Alberta.

Early Advertising

Roman Workman Had the Right Idea 1800 Years Ago

"Balbus made it." These words were stamped in Latin on a bright red potsherd which was found recently by workmen digging the foundations for a new building near London Bridge, London, England. They found the potsherd at the base of a Roman wall, with a Roman trowel, almost identical with a modern trowel beside it. Balbus was evidently one of the first men who perceived the value of advertising. "Balbus made it" has also been found on other Roman utensils. His advertising enterprise has preserved his name for 1800 years.

Neither One

Stenographer — "Howja spell sense?"
Doss — "Dollars and cents or horse sense?"
Stenographer — "Well, like in 'I ain't seen him sense'."

A World Language

Theory That the Radio May Bring This About Is Discussed

The suggestion that the need of a world language has been given compelling impetus by the development of the radio is probably open to challenge. That a universal speech would aid universal peace has been widely recognized. The increasing number of international conferences, conducted now at 300 a year, ranging from "bicyclists to free thinkers," is possibly also accelerating the desire. Commerce, too, would be facilitated by the adoption of a common medium of communication.

But practical difficulties should not be overlooked. Linguistic amalgamation is something civilization has resisted for 10,000 years. The ancients travelled widely, over what was then the known world without the necessity of first learning foreign tongues. Now have conferences broken down the barriers. German peripatists in rural districts of Pennsylvania and French flourishes in Quebec. Grand opera is enjoyed on both sides of the Atlantic undisturbed by the annoyances which an alien grammar and syntax impose on the schoolroom. Bernhardi has been welcomed here by great audiences to whom her lines might as well have been spoken in Sanskrit.

These traditions will not be easily upset by the popularity of the radio. Habit is too firmly fixed. A culture that starts in the cradle persists to the grave in more cases than it yields to intellectual adventure. Latin and Anglo-Saxon races may absorb from each other, but they do not coalesce. Compromises on artificial languages like Esperanto are even less likely. We have made only slight headway in cosmopolitan-mindedness, and our cosmopolitan ear is still on the deaf side.—Philadelphia Inquirer.

May Sell Estate

Reported That Earl Of Egmont Has Decided To Dispose Of Avon Castle

Frederick George Trevelyan, the rancher Earl of Egmont, has decided to sell not only Avon Castle, in Hants, the ancestral seat of the Earls of Egmont, but also the hoards, silver and pictures, which he has with the estate. The reason for the prospective sale lies in the large death duties levied on the estate of his kinsman, the ninth earl, and the duties which his own estate must eventually be, states Lord Egmont in explanation.

It was only a few weeks ago that Frederick George Trevelyan's right to the title and its properties was confirmed by a judge of the high court. The earl says he will sell the movable first. "I want to see what I can raise on them and other properties before putting a price on the castle," he added.

The present and tenth Earl of Egmont succeeded to the title last year. He was formerly an Albertan rancher. His claim was contested by two persons, who traced descent from earlier earls, but the ninth earl, armed with the family tree, had designated the Albertan as his lawful heir and the high court upheld the present earl.

Two Modest Filers

When Colonel Lindbergh and Squadron-Leader Kingsford-Smith met in New York, each credited the other with having made the outstanding flight in aviation history, and in a way each was right. The incident shows that the two are very capable and courageous men who retain their sense of proportion in the face of their great achievements. Because of their modesty the world regards them both with admiration and kindly feeling.

A Happy State

I would I were beneath a tree;
A-sleeping in the shade;
With all the bills I've got to pay,
Paid!

I would I were beside the sea,
Or sailing in a boat,
With all the things I've got to write,
Wrote!

I would I were on yonder hill,
A-basking in the sun;
With all the work I've got to do,
Done!

Talkies For Blind and Deaf

A talkie apparatus is to be installed in the Royal School for the Blind, Leathershead, England. Officials of the institution say that the totally blind will be able to follow the story by sound, the partially blind will see and hear, and the deaf and dumb, of whom the school contains a number, will see the film.

Motorcycles in France now number more than 300,000.

Women Direct Poultry Pool

Saskatchewan Poultry Pool Is Practically All-Feminine Organization

Farmers' wives boss the Saskatchewan Poultry Pool and the pin money they take in every 12 months is written in six figures.

The pool, an almost 100 per cent. all-feminine organization, is four years old, and last year took in a total of \$730,000. There is only one man with his finger in the pie, and he is outnumbered if not suppressed.

In the last 12 months the business turnover of the pool included 26,840,184 eggs, or 2,236,682 dozen, valued at \$540,000. Also included in the turnover were 823,743 pounds of dressed poultry, valued at \$184,000, and 39,561 pounds of live poultry, worth \$6,000.

The egg business increased in 1920 over 56 per cent, and the dressed poultry 61 per cent. over the previous year. The pool now handles about 75 per cent. of the entire production of eggs in the province of Saskatchewan.

Mrs. Bertha Holmes, of Assiniboia, Sask., is president of the organization, which is known officially as the Saskatchewan Co-operative Poultry Producers, Limited, and five farmers' wives are on the board of directors. Originally the pool was established by the women to provide them with pin money. Now they are buying automobiles on their earnings.

Behold—The Hen

Everyone Can Take a Lesson From the Industrious Barnyard Fowl

"Did you ever stop to think—that hard times mean nothing to a hen? She just keeps on digging worms and laying eggs, regardless of what the newspapers say about conditions. If the ground is hard, she scratches harder. If it's dry she digs deeper. If she strikes a rock, she works around it. But always she digs up worms and turns them into hard-shelled profits, as well as tender broilers. Did you ever see a pessimistic hen? Did you ever know of one starving to death waiting for worms to dig themselves to the surface? Did you ever hear one scold because time were hard? Not on your life! She saves her breath for digging and her cackles for eggs."—Exchange.

New Kind Of Goliwog

Near-Sighted Lady Mistook Excited Child For Doll

The other day a kind lady took the minute, fuzzy-haired child of one of the young Kings, a negro girl, to a big London shop to buy him a present, says Mr. Gossip in the Daily Sketch. While she turned to talk to an assistant she left the child, rigid and wide-eyed with excitement, sitting on a chair among the dolls. When she turned round again she was horrified to find a short-sighted old lady in consultation with another assistant. "What," she was asking, "is the price of this goliwog?" "It does not appear to be marked, madam," said the assistant. "I will go and inquire."

Four Good Habits

If Cultivated Will Help Greatly In Attaining Success

There are four good habits—punctuality, accuracy, steadiness, and despatch. Without the first of these time is wasted; without the second, mistakes the most hurtful to our own self and interest; and, thirdly, without the third nothing can be well done; and without the fourth opportunities of great advantage are lost, which it is impossible to recall.

"Son"—"I was just sowing my wild oats."
"Dad"—"All right; I'll attend to the thrashing."

Housewives of Edinburgh, Scotland, are just beginning to use electric washing machines.

"Don't you know that fishing is forbidden here?"
"I'm not fishing."

"Then what are you doing?"
"Teaching a worm to swim." — Buen Humor, Madrid.

Harsh, Gripping Purgatives Are Dangerous!

Cheap, harsh laxatives may prove very costly. Painful rectal troubles are often aggravated by the unnatural gripping condition such cathartics cause.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

CHAPTER XXIII

If there had been any doubt that Wickfield would accept Doctor Howe's assistant, it was dispelled when he successfully removed Diana Moore's appendicitis.

"And no wonder," the old doctor said to Grandma, a week after the operation. "There wasn't time to take the child to the hospital. There wasn't even time to get a nurse. It's no easy thing to perform an operation under such circumstances. I felt like cursing the demon for his part, money in not having had his house wired for electric lights; but I'll say for Luella that her lamp chimneys show like nothing before seen in heaven or on earth! And somehow, we did the job. The first weeks' arison—except Edgar! He asked me tonight if they couldn't get along without the nurse we got from Portland the next morning."

"I presume that poor Luella will never hear the last of the expense," sighed Grandma, "but I shan't waste too much pity on her because she put her hand into the noose with her eyes open. Well, Edward, it's a long time since I've seen you to have a talk. With a doctor right in the house I haven't bothered you when I had an ache or pain—not that I'll ever feel the same to any doctor that I do to you," she added joyfully.

The old man smiled. "I'm only a habit, Polly," he reminded her. "You can trust John Carter, take my word for it. It's going to be easier leaving you all when my time comes, knowing you're in good hands. It was a fortunate day for me when I brought him here." "And fortunate for us, too, Edward. I don't know how we'd manage without him to tend the furnace now Charman's away all day. But you mustn't talk about leaving us. Whether we send for you or not, it's a comfort to know you're here. May be I'll go first, Edward, and be on hand to greet you in the heavenly kingdom!"

"Perhaps you will," the doctor admitted, smiling, "but I hope not, Polly. I'd rather know that you were down here keeping watch over Wickfield from when I brought him here."

"And fortunate for us, too, Edward. I don't know how we'd manage without him to tend the furnace now Charman's away all day. But you mustn't talk about leaving us. Whether we send for you or not, it's a comfort to know you're here. May be I'll go first, Edward, and be on hand to greet you in the heavenly kingdom!"

"Perhaps you will," the doctor admitted, smiling, "but I hope not, Polly. I'd rather know that you were down here keeping watch over Wickfield from when I brought him here."

"Perhaps you will," the doctor admitted, smiling, "but I hope not, Polly. I'd rather know that you were down here keeping watch over Wickfield from when I brought him here."

W. N. U. 1849

too; but between you and me, Edward, I don't know what's keeping 'em apart unless it's Jimmy Bennett."

The doctor glanced up in surprise. "I had an idea that all that was settled before Jim went to California."

"Then you guessed wrong," replied Grandma with decision. "What made you think so?"

"Something Jim said to me before he went. I thought that was what reconciled him to leaving Wickfield. Well, it's possible that I misunderstood; and I'm not rooting for my young doctor if it's going to hurt Jim Bennett, Polly; you can bank on that. I never knew a finer, cleaner chap than Jim."

"Well," said Grandma, "I suppose these young folks will have to settle it themselves, Edward. The best thing, I think, is not to get mixed up in it, and I'm not sure that I'm not right at such a time. But it looks to me as if Jim was destined to spend his life picking peaches for his mother."

"I'd rather he picked one for himself, Polly," said the old man whimsically. "As Edgar Purdie is fond of quoting, 'It is not good for man to live alone,' and one realizes that truth better than I; I've had a happy life, and I hope, a useful one; but I never came in after the day's work that I don't wonder how it would seem if Kate were there to greet me. No, I don't want either of those boys to live as I have."

"You'll come again soon?" asked Grandma wistfully, as her old friend picked up his shabby bag, and prepared to leave.

"Yes, I'll drop in often. From now on I'm going to take things easier and see more of the folks I really care for. Good-night, Polly. Give my love to Charman."

He was as good as his word. As the relentless New England winter gave way to warmer days, Charman became accustomed to finding the old doctor sitting with Grandma when he returned from school. Yet he had not given up his work by any means. There were still some who would have none of the younger man while they could get the old; there were others to whom his very presence meant so much that he could not forsake them; and there were the poor and lonely who needed no medicine save his cheery greeting.

Spring was coming. Jim's breath was in the air despite patches of snow that lingered tenaciously in shady places.

"I'm filled with a longing to clean house," said Charman, coming in on the two old folks one afternoon. "Pussy willows are out, though I thought they'd never come; and the frogs are peeping."

She stooped to kiss her grandmother, and when the doctor said, "Have you another of those to spare, child?" she kissed him, too.

"You're to have supper with us, Doctor," she commanded. "We'll have a party—you and Grandma, and Doctor John and I. Two simply got to do something to celebrate the return of spring. I feel as if I could hardly wait for the first May flowers!"

"I'll stay," said the doctor. "Only don't make company of me, my dear."

"I want to make company of you," laughed Charman. "I feel exactly like company. I shall get out the gold-banded china and use the Davis teapot though it's far too large. Here's John. He's not too busy to help me help."

W. N. U. 1849

tened and laughed and sympathized. The young people did their share of the talking, too; and their audience was fully as sympathetic. Even a telephone call to South Wickfield for Doctor Howe, did not mar the party.

"At least," said Charman, "they let you finish supper!"

"And I'll go with you as chauffeur," declared John Carter, as the old man arose.

The doctor smiled happily at them all, and said: "I've had a beautiful time. Good-night, Polly."

He stooped, and with old-time gallantry kissed Grandma's hand; then turned to Charman and kissed her cheek.

"There are compensations for being over seventy," sighed John Carter, and they all laughed.

"Good-night," said the old doctor again as he reached the door. "Sweet dreams to both of you."

Afterwards they remembered that he had stood for an appreciable moment looking back into the room, as if to impress the scene upon his memory. And that night, his day's work done and his house in order, the old man crossed the River, so gently, so peacefully, that he did not even know he had embarked.

CHAPTER XXIV

Grandma sat at the window, looking out at a strangely deserted Main Street—waiting.

All Wickfield, she thought, must be at the church, paying the last tribute of respect and love to its old physician. The bank was closed; and the schools, also. Charman had begged to stay at home so that his grandmother need not be alone at this sad time; and Lizzie Baker had done likewise, the tears straggling unbidden down her cheeks as she implored: "Please let me. You mustn't stay here by yourself."

Salina Knowles had said: "I'll stay with you, Grandma. The doctor wouldn't want you to be alone."

But Grandma, refusing all these kindly offers, had replied gently: "I'd rather be alone, if you don't mind. It's what I want."

Doubtfully, sorrowfully, they had turned away, to be reassured by the young doctor, who, even more than Charman, understood the old lady's mood.

"Don't you see," he explained at sight of their troubled faces, "it'll be easier for her with no one by? She's not even as sad about it as we are. She knows that her old friend is not dead—he is 'just away.' Leave her alone."

So Grandma sat at the window, waiting. . . .

"It's the sort of day that Edward always wistfully," she mused. "Spring's in the air, and summer's on the way. And he went just as he hoped he'd go. I remember he said only the other day, 'And may there be no sadness of farewell, when I embark.' He got what he deserved, a peaceful ending to a useful life. . . . What more could a body ask?"

He was as good as his word. As the relentless New England winter gave way to warmer days, Charman became accustomed to finding the old doctor sitting with Grandma when he returned from school. Yet he had not given up his work by any means. There were still some who would have none of the younger man while they could get the old; there were others to whom his very presence meant so much that he could not forsake them; and there were the poor and lonely who needed no medicine save his cheery greeting.

Spring was coming. Jim's breath was in the air despite patches of snow that lingered tenaciously in shady places.

"I'm filled with a longing to clean house," said Charman, coming in on the two old folks one afternoon. "Pussy willows are out, though I thought they'd never come; and the frogs are peeping."

She stooped to kiss her grandmother, and when the doctor said, "Have you another of those to spare, child?" she kissed him, too.

"You're to have supper with us, Doctor," she commanded. "We'll have a party—you and Grandma, and Doctor John and I. Two simply got to do something to celebrate the return of spring. I feel as if I could hardly wait for the first May flowers!"

"I'll stay," said the doctor. "Only don't make company of me, my dear."

"I want to make company of you," laughed Charman. "I feel exactly like company. I shall get out the gold-banded china and use the Davis teapot though it's far too large. Here's John. He's not too busy to help me help."

every one to join in it, he said), and for Mr. Merry to read 'Crossing the Bar'—not much more. . . . It must be over now. . . . Yes—they're coming. . . .

(To Be Continued.)

Canadian Women Score Again

Canadian Women Greatest Travellers In the Summer Months

Another distinction may be marked up for the women of Canada. Last year a British artist publicly declared that in his opinion Canadian women were the most beautiful of their sex in the British Empire, and of course the women throughout the Dominion did not dispute what Canadians generally consider to be such an obvious fact. Now Canadian women are credited with being greater travellers than the mere men of their country—in summer. In one of the leading Canadian newspapers the following item recently appeared:—

"Canadian women are great travellers—in summer. When father is at home, tending to his work, mowing the lawn and keeping house alone, the wife and children go off to the seaside or the country and such movements constitute the bulk of the traffic."

"One of the big railway systems of Canada furnished a few days ago a two weeks' check on the sex of passengers in the heat of summer travel. It was disclosed that eighty per cent. are females and twenty per cent. males. This disparity, however, does not exist all the year round. A similar check taken in winter disclosed about a fifty-fifty even break between the number of men and women travellers."

Drives Asthma Like Magic. The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

Canada Owes Much To Early Missionaries

Jesuit Fathers Opened North America To Civilization

The ceremony of canonization at Rome must make a deep appeal to all Canadians who are familiar with the early history of this country, regardless of whether or not they are members of the church that thus honored its devoted sons. The eight Jesuit fathers who nearly three centuries after their heroic deaths have been canonized played a great role in the opening to civilization of the northern half of this continent. No one can have read pages of Parkman without holding their memories in reverence. The story of their exploits and of their martyrdom is one of the most moving in the whole range of human annals.

The example that they gave was followed by a large company of other "soldiers of the cross" who carried religion and all the influences that follow in its train further and further into the outlying parts of what is now the Dominion. Our debt to these pioneer missionaries is one that cannot be over-estimated.—Edmonton Journal.

Prince's Carpet Sold

A Scotch hand-woven wool carpet which once covered the floor of Prince Charles Edward's bedroom at Culoden House, where he slept the night before the famous battle, brought only \$150 at an auction sale in Glasgow, Scotland, recently. An ancient hall-pot, measuring 18 inches across, which was said to have been used by the Highlanders on the field of Culoden, was eagerly bid up and went for \$70.

"What did they teach you today in Sunday school, son?"

"I learned how to say, 'Yes, mam,' and 'No, sir,' when answered questions."

"Did you, indeed?"

"Yup."

They Like Canada

Earl and Countess of Stair Favorably Impressed With Dominion

Laughingly reminding reporters who met them on their arrival a month ago, the Earl and Countess of Stair were both very ready to give their impressions of Canada, when interviewed at Montreal just before sailing for home on the Canadian Pacific "Duchess of Richmond."

"You will remember," Lady Stair said, "that we were afraid you were going to ask our opinion of the Dominion on the day we landed, and then let us off when we promised to give that at the end of the visit."

"Both were enthusiastic about the Dominion, which they visited from coast to coast during their month's stay. . . . 'What really appealed to us more than anything,' Lord Stair remarked, 'was the hospitality of Canadians.' By George, they don't care what it is you want, they jolly well get it done for you."

"One of our principal interests during the visit was to see the conditions under which the cattle we shipped out here are herded. And I must say that I was disappointed to see so many Holsteins and so few Scottish cattle. The Ayrshires we sent out to British Columbia last September are in remarkably fine shape."

During their visit to the coast, the Earl and Countess paid a visit to the Agricultural College at Vancouver, where they were shown prize-winning cattle also from their own Scottish estates.

In Memory Of Canadian Poet

Memorial Erected To Bliss Carman In Fredericton, N.B.

The house in Fredericton, N.B., where Bliss Carman, noted Canadian poet, was born, has been memorialized. A bronze tablet on the front of the house was recently unveiled. The inscription on the tablet reads:

"In this house Bliss Carman, Canadian bard and internationally loved poet, 1861-1929. This tablet is erected by the Imperial Order, Daughters of the Empire in New Brunswick. Earth of my mother earth, spirit to thee."

This is the first memorial erected to Bliss Carman, who died in Concord, N.B., June 8, 1929, and whose remains were brought to his native home by the Government of New Brunswick and buried at Forest Hill Cemetery, Fredericton, where a suitable monument will mark his grave. It is proposed to erect a statue of this famous son of New Brunswick, the capital of his native province and the city where he spent his boyhood days.

Mysterious Fossil Bones

Many Queer Catches Made By North Sea Fishermen

The barbed skull of a mammoth found in the nest of a Grimsby trawler, is but the latest of many queer catches made by North Sea fishermen. Not a few of the fishermen's gardens along the Norfolk coast are ornamented with fossil bones of the cave bear, elk, bison, rhinoceros, and mammoth, brought up at various times by the trawls, chiefly in certain regions about fifteen miles off Grimsby, sometimes called "the graveyards" or "the silver pits." Geologists suggest that the remains come from what was in prehistoric times the valley of the Rhine.

Sores Flew Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eucletic Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

Work For Unemployed

Preliminary survey of the northern part of Saskatchewan, in connection with the provincial government scheme toward solution of unemployment, has been completed, said Hon. J. A. Merkle, Minister of Labor and Industries. The proposed camp scheme can not be inaugurated, he said, in co-operation with officials of the Prince Albert National Park. It has been decided 50 men may now be employed there cutting away dead and burned wood.

Japanese Visiting Canada

While the Canadian Chamber of Commerce is completing plans for its official tour of China and Japan, leaving Vancouver, October 16, on the liner "Empress of Russia," an important party of Japanese manufacturers and merchants arrived at Vancouver on the "Empress of Canada," for a tour of observation through Canada and the United States.

Plant life can only exist to a depth of 600 feet below sea level. Animal life can exist four miles down.

Have Minard's Liniment on your shelf.

Cooley; layer cake, Mrs. Young, Mrs. Rennie; candy, Mrs. Stecke, Mrs. Daley; shortbread, Mrs. Richards, Mrs. H Smith; doughnuts, Mrs. Hille, Mrs. Wilton; angel food cake, Mrs. L. Cooley, Mrs. Stecke; layer cake, girl under 16, Betty Milligan, Isabel Tait; bread, girl under 16, marjorie Lee, Betty milligan.
(Continued Next Week)

J. E. Bunney, of Langford district, has a cow which gave birth to twin heifer calves on Aug. 1st. Both calves are hale and hearty. This is the first twins born on his farm since he has been farming.

Henry Thompson, wife and son, of Rolling Bay, Washington, are visiting at present at the Len Cooley home.

Here and There

(575)
"Bill Haven of Southmore "big Alaskan police dog with an aristocratic background, from the Clark Kenzie, Toronto, is on a 7,000-mile trip from Toronto to Yokohama by Canadian Pacific Express and Empress of Asia to the order of a Japanese merchant of the latter city. During his last journey the dog is in charge of Canadian Pacific officials.

Twenty New Zealand athletes and twenty athletes from Australia have already arrived at Hamilton for the Empire Games under the chairmanship of E. W. Beatty chairman and president of the Canadian Pacific Railway. There will be representatives from Great Britain, South Africa and nearly every province of Canada at the Games, which are scheduled to be held in the Ontario city next month.

Doubling the population of Co-bourg for the day, a force of more than six thousand members of the Canadian Pacific Recreation clubs of Toronto and Trenton set a new record for picnic attendance when the annual function was held there recently. The freedom of the city was conferred on this western of all sports and the high spot of the day, the Groulx trophy of the softball match between the Toronto and Trenton clubs, was won for the fourth year in succession by Trenton.

With an aggregate of 123 years of unbroken service, three Canadian Pacific engineers from the Ontario district retired on pension recently. They are John Douglas, Thomas Bennett and John G. Moore and all have unblemished records. Bennett's service goes back to 1857 while Douglas and Moore go back to 1855 and 1859 respectively.

The Toronto Industrial Commission announces that between January 1 and June 30, 15 new industrial firms have come to Toronto, with which the commission has co-operated. Of these, 11 had their origin in the United States and 4 in Canada. The list of these new industries includes a number of outstanding companies whose entrance into the assembling and manufacturing field in Toronto means an important growth and development in the city's industrial life.

New Post In C.P.R. Telegraphs

Growth of the Canadian Pacific Telegraphs and pressure of business have brought about the appointment of an assistant general manager, a new position, creation of which was made effective this month. The new assistant general manager goes to W. D. Neill who was assistant general manager, stationed at Winnipeg, No. 4 of Illustration. Other appointments resulting from this are: No. 3, W. M. Thompson, superintendent, Ontario Division, Toronto, to be assistant manager, western line, Winnipeg; No. 1, H. S. Ingram, superintendent, eastern division, Montreal, to be superintendent, Ontario division, Toronto; and No. 2, W. S. Emery, chief operator, Montreal to be superintendent, eastern division, Montreal.

Get Your Grain Truck Ready Here Are Your Tires

"It won't be long now" until you'll be putting your grain truck back into hard service. How are its tires? We've got a big stock of Goodyear Heavy Duty Tires we'd like to show you. They're mighty husky because they're made with Goodyear Super-twist Cord. And they've got a tread that can't be beaten for pulling you out of the mud. Your size is here. And the price is right.

SERVICE GARAGE COOLEY BROS.

Telephone 10 CHINOOK, Alberta

The Only Larks in America

Fifteen minutes car drive from the Empress Hotel, Victoria, is the only colony of skylarks on the continent of North America. This western of all songsters, of whom Canadian children read in all anthologies of British poetry, but which they have never seen or heard in actual life in their own country, were in this one section of the Dominion, has been acclimatized at Victoria successfully. They are

to be found in considerable numbers among the oaks to the north of the city, on the slopes of Mt. Tolmie, at the Colwood Golf course, among the orchards of Gordon Head, in the deep meadows near Elk Lake, and from the flower-scented grounds of Butchart's Gardens. Photographs show the Gardens with insect of the English skylark.

Rearville News
